Subject: Buying SGI's patents is anti-competitive.

Good Lord.

Microsoft has purchased the 3d patents of SGI.

SGI had the best 3d rendering technology available and the SEC let them buy it from SGI>

Now MS will be able to kill this superior technology and push their expensive, licensed, inferior one on the market.

The DOJ ruled 'Don't do it again!' and yet they do it, and do it , and do it.

Stop these 800,000,000 pound gorillas now or this court will be remembered in history books as the justices who when they had the chance to stop the bad guys, they blinked.
